

RALLYTRAXX 2010

The modular Sporttraxx rally solution for

- Full live GPRS or Inmarsat Tracking
- Full timing+results service
- Communication vehicle-to/from-HQ (**SOS-OK-CallBack-YellowFlag**)
- Communication vehicle-to-vehicle (**GiveMeWay-EnteringDangerousArea**)

Each competitor compulsory needs:

Tracking unit on top of vehicle

Supplied on rental, fixed and tested by Sporttraxx technician during technical scruteneering with wire for connection to electronic interface

Tracking unit + wire must be returned at finish of race

CommBox inside vehicle in front of codriver

Supplied on rental, fixed and tested by Sporttraxx technician during technical scruteneering

CommBox must be returned at finish of race

Car kit installed in vehicle by competitors

Must be purchased by competitor and can be used in future events where GPS Tracking is supplied by Sporttraxx

The car kit will be provided before technical scruteneering and can be installed in few minutes, provided a 12 Volt direct power supply is setup inside the car

Car kit components

- Electronic Interface (electronic fuse+filter and stabilisator)
- Wire for CommBox
- CommBox bracket
- Power wire with fuse holder+fuse
- Instructions

Procedure

1. **Register online and book the equipment**
2. **Collect the Car kit on rally site before technical scruteneering**
3. **Install the Car kit, provided you have setup direct power supply in car**
4. **Show up at technical scruteneering where Sporttraxx will provide and test Tracking device and CommBox**
5. **At the end of race, or after retirement, return the Tracking device, its wire and the CommBox. Missing or damaged parts will be charged upon the compulsory deposit. Return equipment ONLY to Sporttraxx technician who will issue a receipt.**

Note: A 12Volt power line, fused, connected directly to battery must reach the rear of codriver's seat.

Installation time of car kit takes around 5 to 15 minutes according to provided instructions.

Car kit can be tranferred to other vehicles, in other races, where Sporttraxx is in charge with Tracking and/or Timing service. All the components must be reinstalled in new vehicle.

Optional accessories

- Additional Buzzer
- Additional Flasher
- Additional Switch for GMW function
